In the “Purpose” column, write a short description of each subnet. If needed, you can write a more detailed description in the “Insert Supplemental Comments” section at the end of the form.

Complete the remaining columns with a cross (x) or a dash (-). For example, if the End User will use a subnet within three months, enter a cross in the “Within 3 months” column and a dash in both the “Within 1 year” and “Within 2 years” columns.

The “netname:” should be a short, descriptive name for the network and should reflect the End User's organisation name.
