

Package ‘mise’

June 30, 2016

Title Clears the Workspace (Mise en Place)

Version 0.1.0

Description Clears the workspace. Useful for the beginnings of R scripts, to avoid potential problems with accidentally using information from variables or functions from previous script evaluations, too many figure windows open at the same time, packages that you don't need any more, or a cluttered console. Uses code from various StackOverflow users. See `help(mise)` for pointers to the relevant StackOverflow pages.

mise*Clear the Workspace (Mise en Place)***Description**

Clears the workspace. Useful for the beginnings of R scripts, to avoid potential problems with accidentally using information from variables or functions from previous script evaluations, too many figure windows open at the same time, packages that you don't need any more, or a cluttered console.

Usage

```
mise(vars = TRUE, figs = TRUE, console = TRUE, pkgs = FALSE)
```

Arguments

<code>vars</code>	clear all variables and functions in the parent environment?
<code>figs</code>	close all figure windows?
<code>console</code>	clear the console?
<code>pkgs</code>	clear all non-base packages? Defaults to FALSE.

Details

Based on StackOverflow contributions from users David Robinson, shadow, Gavin Simpson, Ramnath, Joshua Ulrich, E Luxo So, and krlmlr; see <http://stackoverflow.com/questions/29758000/function-to-remove-all-variables> <http://stackoverflow.com/questions/19449066/command-to-close-plots-in-r> <http://stackoverflow.com/questions/7505547/detach-all-packages-while-working-in-r> <http://stackoverflow.com/questions/1233777/if-r-is-running-in-rstudio-1>

Examples

```
library(mise)
x <- seq(1, 10, by = 1)
y <- x + rnorm(10, mean = 0, sd = 1)
plot(x, y)
ls()
# change figs to TRUE to also clear the figure
mise(figs = FALSE)
ls()
```
